

# Slicer Welcome

Sonia Pujol, Ph.D.  
Brigham and Women's Hospital  
Harvard Medical School

# Goal

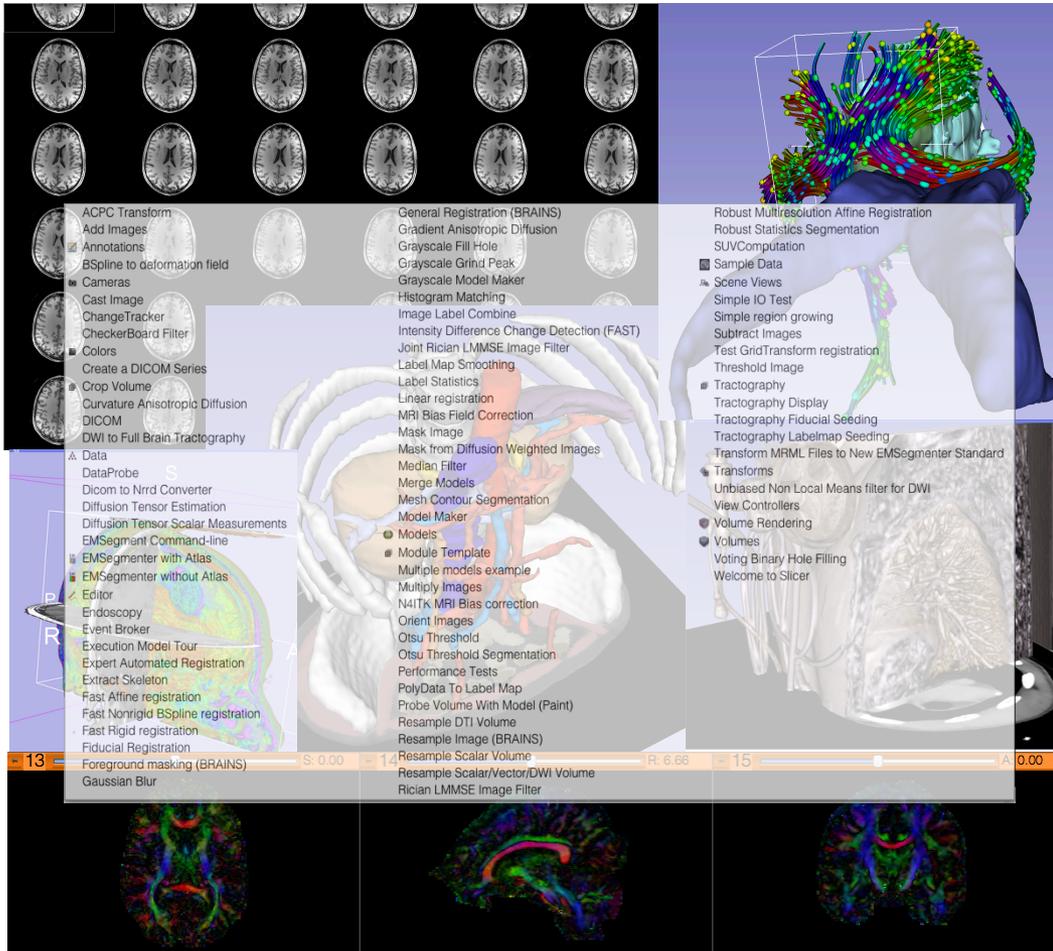

This tutorial is a short introduction to the Welcome module of the Slicer open-source software.

# Slicer4 Basics

- Slicer is an open-source software for segmentation, registration and visualization of medical imaging data
- The platform is developed through a multi-institution effort of several NIH funded large-scale consortia.
- Slicer is for medical research only, and is not FDA approved

# Slicer4 Basics

Slicer4 contains 92 modules for image segmentation, registration and 3D visualization of medical imaging data.

Slicer Welcome - Sonia Pujol, Ph.D., NA-MIC  
ARR 2011-2012

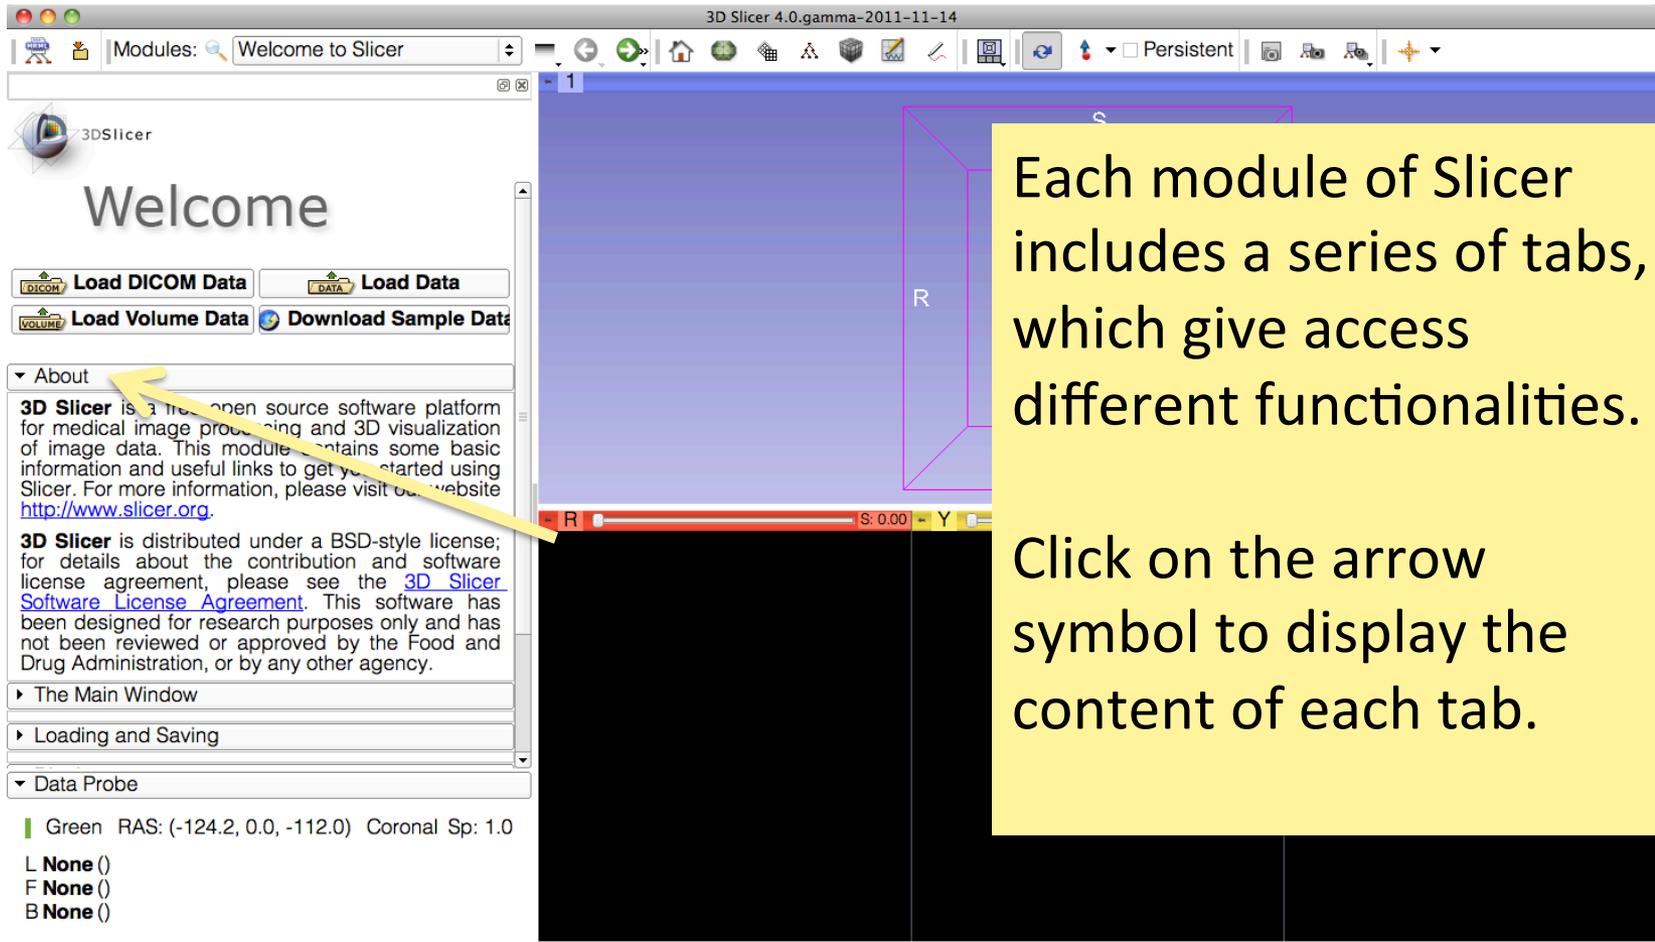

# Supported Platforms

- Slicer is a multi-platform software developed and maintained on Mac OSX, Linux 64 & 32, and Windows 64 & 32.
- Slicer requires a minimum of 2 GB of RAM and a dedicated graphic accelerator with 64 MB of on-board graphic memory.

# Welcome Module

The screenshot displays the 3D Slicer 4.0 interface. The title bar reads "3D Slicer 4.0.gamma-2011-11-14". The "Modules:" dropdown menu is set to "Welcome to Slicer". The left sidebar shows the "Tutorials & Information" module selected, with a yellow arrow pointing to it. The main window displays a blue background with a yellow text box containing the following text:

The Tutorials & Information tab contains links to the Slicer4 training compendium and documentation.

The sidebar content includes:

- Mouse & Keyboard**
- Tutorials & Information**
- Application- and Module-Specific Documentation**
  - [Slicer4 Documentation Wiki pages.](#)
- Help For Performing Common Tasks:**
  - [General application and specific module documentation.](#)
  - Information on [loading data.](#)
  - Information on [saving data.](#)
  - Information on [creating and editing annotations using the Annotations Module.](#)
  - Information about [using the Editor Module for manual segmentation of image data.](#)
  - Information about [capturing and restoring Scene Views.](#)
  - Information about [volume rendering in Slicer.](#)
- Useful Resources**
  - Data Probe**
    - Green RAS: (-124.2, 0.0, -112.0) Coronal Sp: 1.0
    - L None ()
    - F None ()
    - B None ()

The bottom of the interface shows a color calibration bar with sliders for Red (R), Yellow (Y), Green (G), and Blue (B), with values S: 0.00, R: 0.00, and A: 0.00.

# Slicer4.0 Documentation & Training

The image displays two overlapping screenshots of the Slicer4.0 documentation and training website. The top screenshot shows the 'Documentation/4.0' page, which includes a search bar, a navigation menu, and a table of contents for 'Slicer Application' and 'Module Categories'. The bottom screenshot shows the 'Training/4.0' page, which includes a search bar, a navigation menu, and a table of contents for 'Introduction: Slicer 4.0 Tutorials' and 'General Introduction'.

**CONTENTS** [hide]

- 1 Introduction: Slicer 4.0 Tutorials
- 2 General Introduction
  - 2.1 Slicer4Minute Tutorial
  - 2.2 Slicer4Visualization tutorial
- 3 Specific Functions
- 4 Introduction for software developers

**Introduction: Slicer 4.0 Tutorials**

- This page contains "How to" tutorials with matched sample data sets. They demonstrate how to use the 3D Slicer environment (version 4.0 release) to accomplish certain tasks.
- For tutorials for other versions of Slicer, please visit the [Slicer training portal](#).
- For "reference manual" style documentation, please visit the [Slicer 4.0 documentation page](#)
- For questions related to the Slicer3 Compendium, please send an e-mail to [Sonia Pujol, Ph.D.](#)

**General Introduction**

**SLICER4MINUTE TUTORIAL**

- The [Slicer4Minute tutorial](#) is a brief introduction to the advanced 3D visualization capabilities of Slicer4.0.
- Audience: First time users who just want to get going.
- The [Slicer4Minute dataset](#) contains an MR scan of the brain and 3D reconstructions of the anatomy

**SLICER3VISUALIZATION TUTORIAL**

- The [Slicer3Visualization tutorial](#) guides through 3D data loading and visualization in Slicer3.6. It is an extended version of the Slicer4Minute tutorial
- Audience: Users of Slicer who need a more comprehensive overview over Slicer4 visualization capabilities.

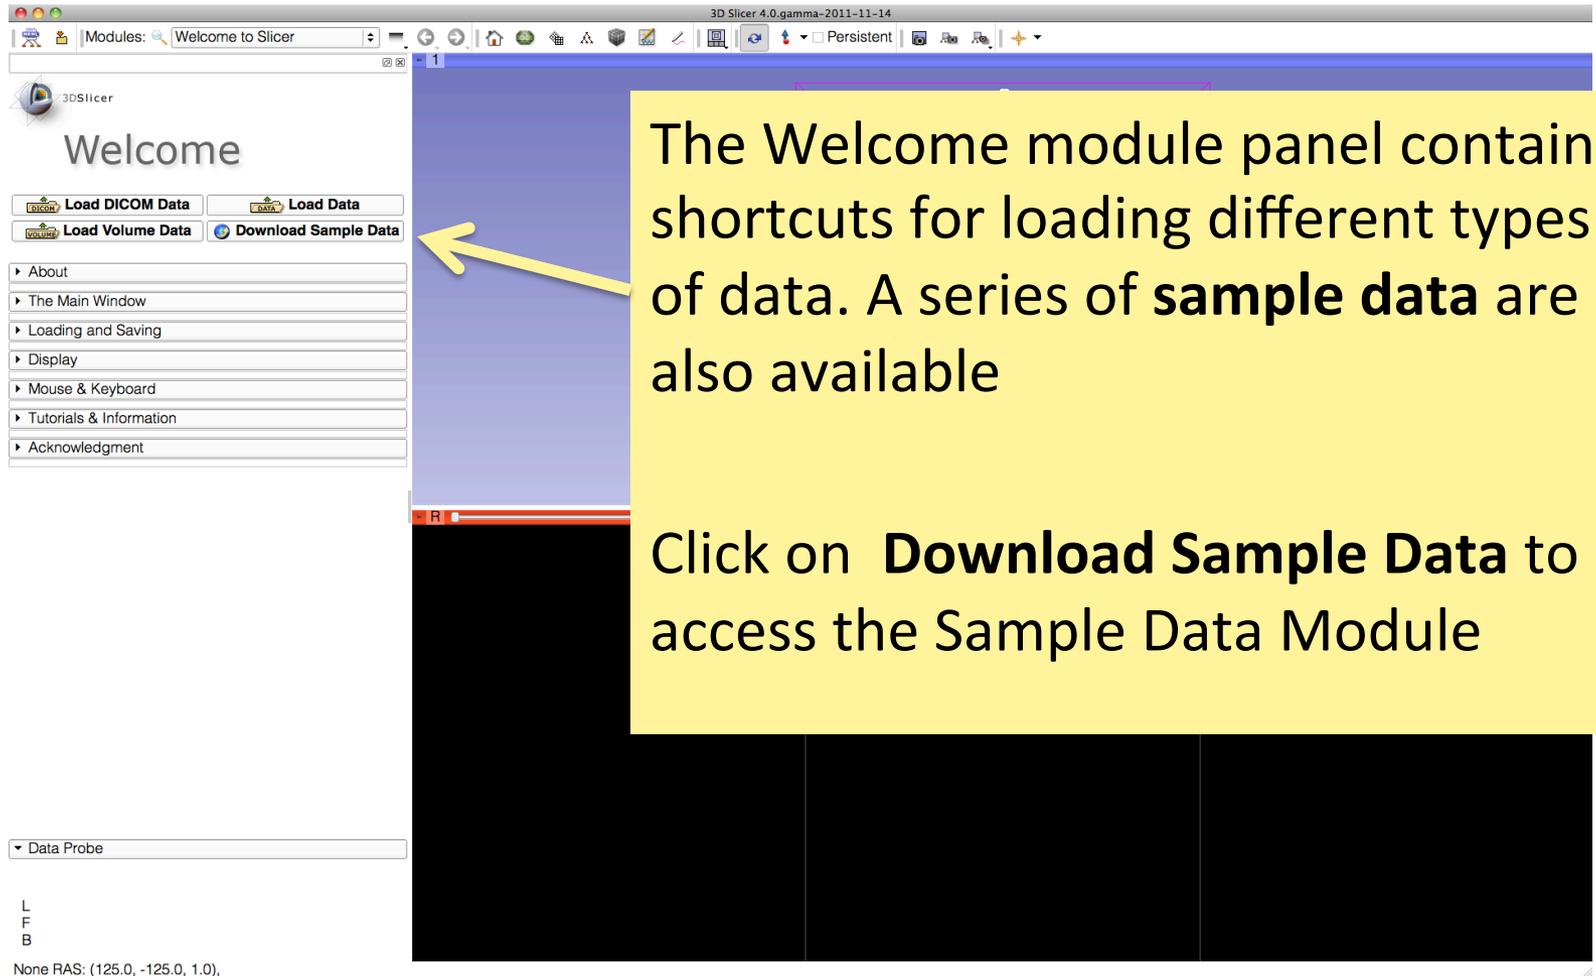

**SLICER4VISUALIZATION TUTORIAL**

- The [Slicer4Visualization tutorial](#) guides through 3D data loading and visualization in Slicer4.0. It is an extended version of the Slicer3Visualization tutorial
- Audience: Users of Slicer who need a more comprehensive overview over Slicer4 visualization capabilities.

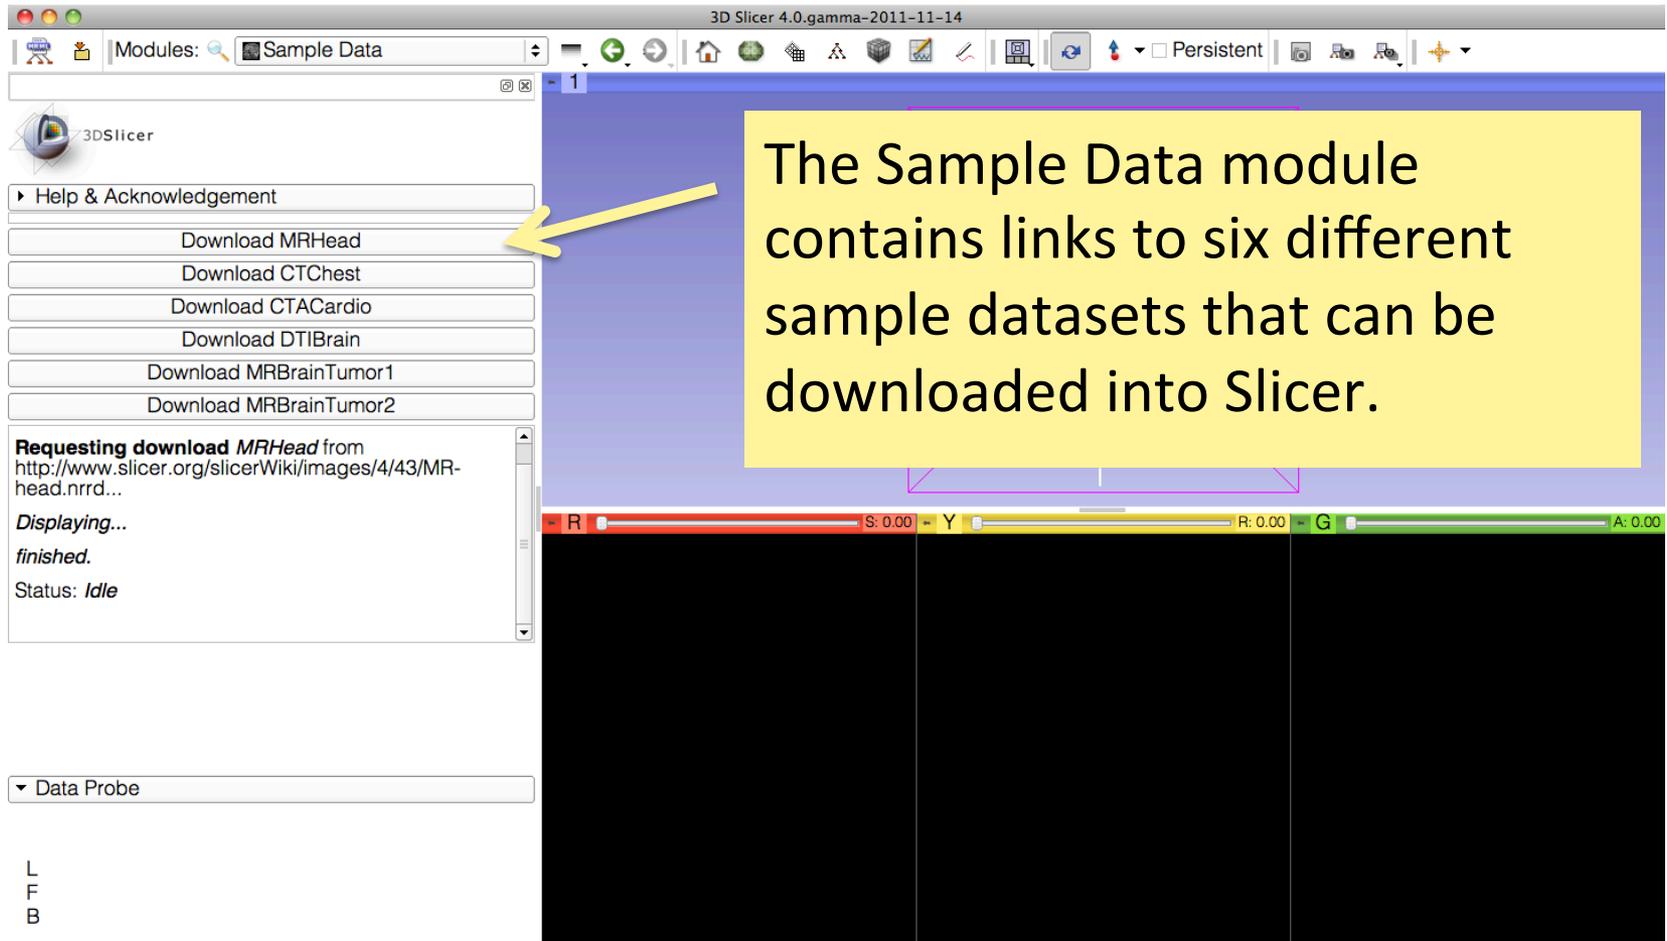

**SLICER3VISUALIZATION DATA**

- The [Slicer3Visualization dataset](#) contains two MR scans of the brain, a pre-computed labelmap and 3D reconstructions of the anatomy.

# Sample Data

The screenshot shows the 3D Slicer 4.0 interface. The top toolbar includes a 'Sample Data' module button. On the left, the 'Sample Data' module panel is open, displaying a list of download options: 'Download MRHead', 'Download CT Chest', 'Download CTACardio', 'Download DTIBrain', 'Download MRBrainTumor1', and 'Download MRBrainTumor2'. A yellow arrow points to the 'Download MRHead' button. Below this list, a status window shows the progress of downloading 'MRHead' from a URL, with the status 'finished' and 'Idle'. The main 3D view area is currently empty, showing a purple wireframe box. The bottom status bar displays 'R: 0.00', 'Y: 0.00', 'G: 0.00', and 'A: 0.00'. The bottom-left corner of the interface has the letters 'L', 'F', and 'B' stacked vertically.

Click on **Download MRHead** to download the dataset in Slicer.

# Welcome Module

The screenshot displays the 3D Slicer 4.0 interface. The title bar reads "3D Slicer 4.0.gamma-2011-11-14". The "Modules" dropdown menu is set to "Sample Data". On the left, the "Welcome Module" is active, showing a "Help & Acknowledgement" section with several "Download" buttons: "Download MRHead", "Download CT Chest", "Download CTACardio", "Download DTIBrain", "Download MRBrainTumor1", and "Download MRBrainTumor2". A status message indicates a successful download of "MRHead" from a URL. Below this, a "Data Probe" section is visible. The main 3D view area is currently empty, with a yellow text box overlaid that says "The MR scan of the brain appears in the 2D viewers." Below the 3D view, there are three 2D viewers showing axial, sagittal, and coronal slices of a brain MR scan. The 2D viewers are labeled with "R", "A", and "L" for Right, Anterior, and Left respectively. The bottom of the interface shows a toolbar with various icons and a status bar with coordinates: "R: -10.71", "Y: -2.80", "G: 6.43".
